

360° Automation for 4 and 5 Axis Machine Tools.

# Flexible Pallet System FPS

# Extendable automation for high mix manufacturing.

- **4 AND 5 AXIS MACHINES**  
with and without APC units
- **CONFIGURABLE SOLUTION**  
for any shop floor
- **EASILY SCALABLE**  
for more machine tools
- **SERVICE**  
to maintain, extend and develop your FPS

Flexible Pallet System is a modular CNC automation solution that enables lights-out manufacturing and high spindle utilization with 4- and 5-axis milling and mill-turn machine tools. What sets it apart from other solutions are its modular 360-degree design, integration capability with over 90 machine brands, and state-of-art MMS production planning capabilities. FPS can be extended or upgraded if there is a change in production needs.

## Productivity Comparison with 3 Machine Tools

**Triple results**

	No automation	with FPS
<b>Investment cost 3 machine tools*</b>	\$ 1,200,000	<b>\$ 1,200,000</b>
<b>Investment cost automation</b>	\$ 0	<b>\$ 900,000 *</b>
<b>Machine tool utilization rate</b>	40 %	<b>85 % ***</b>
<b>Machining hours / year****</b>	4,800 h	<b>15,300 h</b>
<b>Total income per year</b> (machining sales price \$ 100 / h)	\$ 480,000	<b>\$ 1,530,000</b>
<b>Payback time</b>	2y 6m	<b>1y 4m</b>

\* calculated with a 5-axis HMCs  
 \*\* includes automation, 18 pallets and needed machine tool modifications  
 \*\*\* no spindle time loss due manual setup changes + unmanned night shift  
 \*\*\*\* 50 weeks, 5 days per week, 2 manned shifts (+1 unmanned when automated) per day

## Comparison on 3 types of standardized automation systems

	Machine tool with APC	Pallet pool / tower	<b>Flexible Pallet System (FPS)</b>
<b>Pallets per machine tool</b>	2	12	<b>Unlimited</b>
<b>Machine tool brands</b>	–	Limited	<b>Any</b>
<b>New or existing machine tools</b>	New	New	<b>Both</b>
<b>Machine tools controlled by 1 operator</b>	1	1	<b>Many</b>
<b>Shared fixtures between machine tools</b>	–	No	<b>✓</b>
<b>Extendable system</b>	–	No	<b>✓</b>
<b>Cost of extension</b>	Buy a new machine	Buy a new system	<b>Cost effective extension</b>
<b>Unmanned production capacity (pallets)</b>	1	12	<b>Unlimited</b>
<b>Production reports</b>	No	Per machine	<b>Entire system</b>
<b>Real-time automatic KPI reports</b>	–	No	<b>✓</b>
<b>Order priority</b>	Manual	Manual	<b>Automatic</b>
<b>Auto-scheduling</b>	–	No	<b>✓</b>
<b>Production order management</b>	–	No	<b>✓</b>
<b>System efficiency</b>	Low	High	<b>Very high</b>
<b>Tool data &amp; scheduling</b>	No	No	<b>Yes</b>

# Build Your Own FPS

# FPS Modules

FPS is modular system that handles machining pallets and zero-point plates of 300-630 mm. Its unique 360-degree design ensures a fit for any shop floor – the machine tools,

pallet storage units, and operator loading stations can be placed flexibly on all four sides of the system. Build yours!

## At a Glance

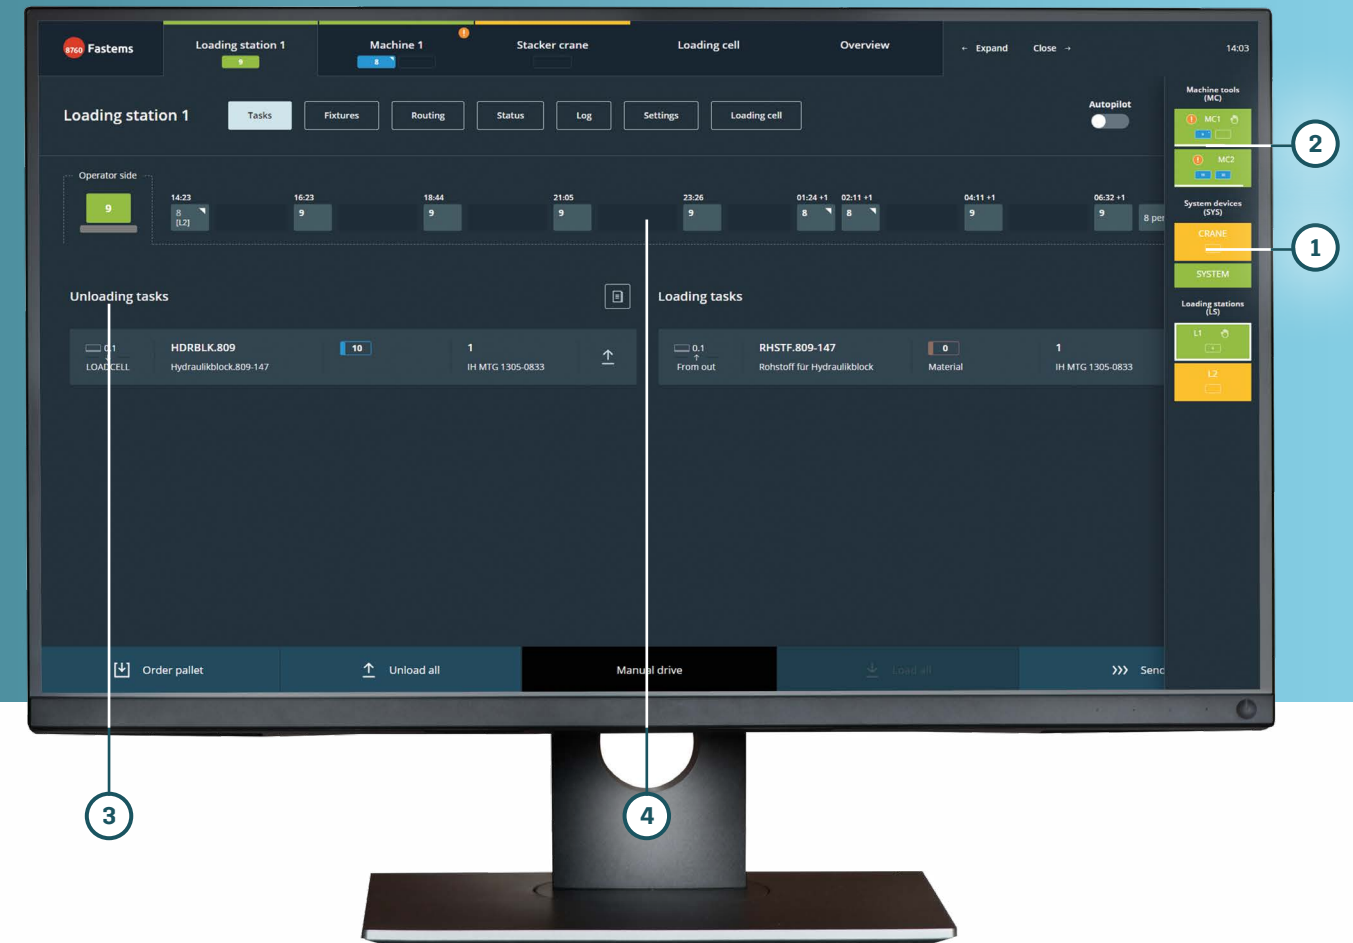

- 1 Pallet manipulator**
  - 360-degree pallet transportation
  - Long reach
- 2 Manipulator rail**
  - build the system that fits on your floor
  - a) 6-meter module
  - b) 3-meter module
- 3 Pallet storage**
  - configurable for different load heights
  - two different heights per system
  - a) Side module for 4-8 pallets
  - b) End module for 6-12 pallets
- 4 Cell controller**
  - touch operating panel
  - ergonomic with adjustable height
- 5 Loading station**
  - ergonomic operation
  - clamping and unloading the parts
  - at a glance system status
- 6 myFastems**
  - easy system maintenance with immediate connection to Fastems service
- 7 Machine tool(s)**
  - with or without automatic pallet changer
  - 300 to 630 mm pallets
  - over 90 brands already integrated with Fastems

Technical specs and dimensions on page 10.

# Manufacturing Management Software MMS

- Automatic production scheduling
- Ready-made interfaces for hundreds of machine tools
- Recognizes resource bottlenecks in advance
- Automatic KPI reporting

## Easy Production Control

The control system of FPS, Manufacturing Management Software MMS, is designed specifically for high-mix manufacturing needs. It is a tool for everyone working in production or managing it, giving a real-time view of production activities. Most importantly, it identifies exactly what needs to be done next to ensure timely deliveries and maximum spindle utilization.

Not only does the MMS consider the pallets that need to be loaded in the machine tools next, but it also checks and ensures that all the other machining resources are there in time – NC programs, cutting tools, and raw materials. When a rush job is received or anything sudden happens, MMS automatically adjusts the production plan.

## Choose from 3 MMS Plans

### STANDARD

Easy to operate - enabling continuous, unattended production for you.

- Pallets are machined based on order-based work queue or FIFO.
- Intuitive user interface with guidance helps operator to focus on the most important tasks.
- Optional ERP interface.

### ADVANCED

Offers transparent and predictive ways to keep you in control.

- Fine scheduling includes production order and resource simulation for up to 96 hours in advance.
- The MMS checks that all the needed NC programs and tools are available via machine tool integration.
- Order completion dates are calculated up to 6 months ahead.

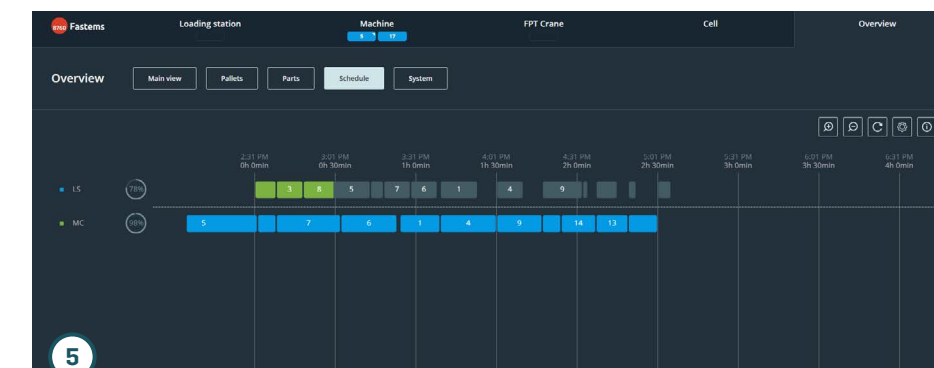

### ULTIMATE

Utilize your existing manufacturing data.

- Define your key performance indicators and view them at a glance with customizable Dashboard.
- Real-time machine status monitoring for continuous production optimization.
- Real-time remote monitoring with alarm functionality for unmanned production.

## At a Glance

- 1 Stacker crane status
- 2 Machine tool view - With or without APC - Current NC program and machined part details
- 3 Loading station status
- 4 Operator loading/unloading backlog tasks
- 5 Machining schedule
- 6 Cutting tool tasks

MMS can schedule production automatically based on production orders or FIFO.

WHEN	TOOL	REQUIRED	MISSING LIFE
2:38 PM	6001 Shoulder milling tool CoroMill 390	1 pcs	00:00:55
2:38 PM	6044 Ball nose cutter for roughing CoroMill® 216	16 pcs	05:40:05
2:38 PM	6056 Deep and narrow grooving CoroMill QD	3 pcs	02:10:10
4:41 PM	3006	3 pcs	03:07:16

MMS Advanced package enables tool planning and status views for the easier cutting tool maintenance.

# Maintain extend, and develop...

# ... throughout the whole life-cycle of your system.

Stay aware & optimize your system

## myFastems – Your Digital Service

### BE INFORMED

- Real-time information and notifications, accessible anywhere and anytime
- First-aid tips and recovery instructions available for proactive problem-solving

### ENHANCED SERVICE MANAGEMENT

- Easy access to service history and reports
- Guided spare part inquiries with photos
- Recommendations on replacing spare part key components

### WE ARE ONE CLICK AWAY

- Increase system' run time with direct access to our 24/7 assistance
- Get support more efficiently with error-coded support requests

### EXTENDED PERSPECTIVE

- Follow service KPIs (utilization, automation index, MTBF, MTTR) for improvement opportunities based on measured data)
- Utilize the full potential of your system with optional monthly reports for comprehensive system insights.

Keep your systems running as they should, and more

## Lifecycle Services

### RELIABILITY – GENUINE FASTEMS SPARE PARTS

#### Spare part offerings

- Expert spare part support and engineering over the lifecycle
- Ensure the fitting spare parts for your system
- 12-month warranty for Fastems spare parts

#### Global delivery

- Flexible delivery globally
- Express shipment possibility within 24 hours for stock parts

### SCALABILITY & ADAPTABILITY

#### Modify and extend when needed

- Enhance your system via software update and new modules
- Extend with additional hardware

#### Improve your competence throughout the whole life cycle through:

- Comprehensive training for operators and maintenance personnel
- Process optimization support by our experts

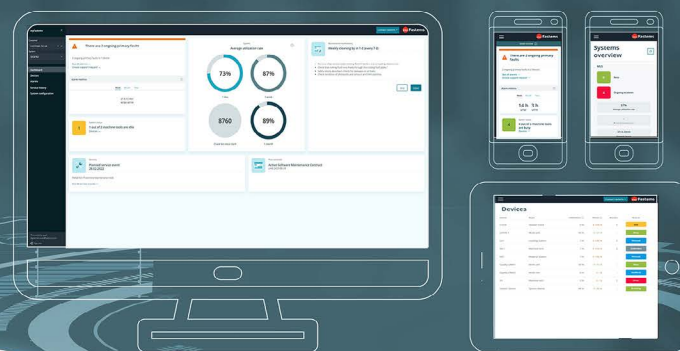

### AVAILABILITY – SERVICE LEVELS

#### Selected services for your needs

- Preventive maintenance: scheduled on-site visits from Fastems experts
- 8760 support: professional 24/7 technical remote support

#### Continuous software advancement

- Ensured reliability and performance of software system through:
- New functionalities and features
  - Security and compliance updates

# Rethink your CNC manufacturing.

- ▶ **Production is a team play.** We help you to integrate your data systems, machines and people to work as ONE. By doing so you reduce costs, increase revenue, improve lead times and ensure consistent quality while minimizing waste, WIP and delays.

Fastems supplies intelligent CNC automation, software and services for high mix CNC manufacturing. We are an open integrator with a library of ready-made machine interfaces for over 90 different machine tool brands.

## KEY NUMBERS:

- 40+ years of automation experience
- 5,000+ installations in Europe, North America, and Asia
- extendable & long-life systems
- 24/7 customer support
