Fastems

myFastems

BECAUSE YOUR MACHINES DESERVE TO RUN TO THEIR FULL POTENTIAL, AND BEYOND

I don't know how to start the digitization of my production.

I don't know how to react after an unplanned production stop

I don't know if I am making money if i am not at the system/laptop

I am not really aware of the service history of our FMS.

myFastems is a **digital service platform**, providing real-time, 24/7 activity statuses for Fastems systems. As part of Fastems' automation systems, myFastems is the first step in digitalizing your production system.

KEY FUNCTIONS

Advanced support requests

Real-time system information and notifications

First-aid tips & recovery instructions

Guided spare part inquiries with photos

Convenient technical support with error-coded requests

Centralized platform for all service documents

Higher Reliability

Higher Flexibility

Higher Predictability

FAQs

Data Handling

We only handle device usage data, excluding sensitive information like NC programs or production orders.

Network Security

We ensure secure data with Microsoft Azure and regular myFastems audits, offering DMZ integration options.

Installation

Compatible with MMS 6+ Fastems systems, remotely configured without production impact.

myFastems Performance

BECAUSE YOUR MACHINES DESERVE TO RUN TO THEIR
FULL POTENTIAL, AND **BEYOND**

I don't have the expertise to identify the unused potential in the Fastems FMS.

I don't feel comfortable to run the production un-manned, what if the MC stops when my workers are gone?

I don't understand what is the root cause for production downtime.

myFastems Performance provides analytics for **Fastems automation systems** and advanced reporting capabilities. Measure the whole system with one KPI: **the automation index.**

Executive Summaries

Clear breakdowns of how your investment has been utilized, while also highlighting key areas for improvement.

Machine Potential

Analytics of idle time of your MC. Find the hidden potential in your system!

Incident Notifications

Real-time incident notifications, keeping you informed of production issues as they happen so you can take immediate action and minimize impact.

Availability Analytics

Detailed insights into downtime reasons and identify patterns, helping you address issues and improve system uptime.

**START UTILIZING THE FULL POTENTIAL OF
YOUR FASTEMS AUTOMATION SYSTEMS
WITH MYFASTEMS PERFORMANCE!**
